Component Interaction

Note: import Input, Output, EventEmitter from '@angular/core'

Showing Contents Conditionally

`*ngIf`

```
<div *ngIf = "condition"></div>
```

Adding CSS Class Conditionally

```
<div [ngClass] = "{classOne: condition, classTwo: condition}"></div>
```

Loop

```
<div *ngFor="let item in items; let i = index">  
  {{item}}  
</div>
```

Ts file

```
class MyComponent {  
  items = [ 'item1' , 'item2' ]  
}
```
